Erasmus Days in Darıca

AISVE ERASMUS DAYS EVENT

On October 16, 2025, the Erasmus Days event, part of the Erasmus+ KA220 Vocational Education Project entitled "AI & Sustainability in VET Education (AISVE)," project number 2023-1-LT01-KA220-VET-000155506, was conducted at the Darıca District National Education Directorate. This initiative is coordinated by Kaunas University of Technology in Lithuania, with the Darıca District National Education Directorate serving as one of the partners.

Murat Balay, the National Education Director of Darıca District, delivered the opening speech at the event, highlighting that Erasmus Days serves as a significant platform for enhancing international collaboration in vocational education. He expressed his satisfaction in participating in such a meaningful initiative. Balay noted that international projects play a crucial role in promoting innovative educational practices and fostering inter-institutional cooperation.

OUR PROJECT IS THE FOCUS OF INTEREST.

During the event, Project Coordinator Pınar Sancaktutan delivered extensive information to teachers and students regarding the Erasmus+ projects implemented by the Darıca District National Education Directorate. The objectives of the projects, their intended audiences, and their contributions to educational processes were communicated to the participants.

The presentation of the AISVE Project was delivered by Zülfiye Okumuş, an English teacher and a member of the project team. It outlined the project's primary objectives, the structure of its international partnerships, the activities conducted, and the results attained.

Subsequently, Information Technology educators Damla Yılmaz and Kazım Burak Sipahi shared the training activities and applications developed as part of the project with the participants. They presented examples of AI-supported applications utilized in training processes, sustainability-focused studies, and innovative methodologies in vocational education.

What do we do with AI Kits?

Following the presentations, participants visited the project stands. At the stands, the training activities, developed applications, and project outputs obtained within the scope of the AISVE Project were presented to visitors through visual materials and practical demonstrations. Participants had the opportunity to meet with the project team individually, obtain detailed information about the theoretical and practical training conducted with Raspberry Pi, and learn about the international cooperation and professional development opportunities offered by the Erasmus+ Program.

The Erasmus Days event significantly contributed to increasing the visibility of the AISVE Project, disseminating the project results, and communicating the impact of the European Union's Erasmus+ Program in the field of education to a wider audience.
