HAVE AN IDEA THAT COMBINES AI AND SUSTAINABILITY?

It's time to put it into practice.

The AI-SAVES4ALL Online Contest is now open, inviting VET students and teachers to develop and share projects that use Artificial Intelligence to respond to sustainability challenges.

Build a team, develop your solution and show us what AI can do when applied to a real problem.

WHAT IS AI-SAVES4ALL?

AI-SAVES4ALL is the international online contest of the **AI & Sustainability in VET Education** project. The challenge is simple:

Identify a sustainability problem and develop a solution that uses AI or related technologies to address it.

Your project can explore how technologies such as artificial intelligence, computer vision, sensors, automation or electronics can be used to respond to environmental challenges.

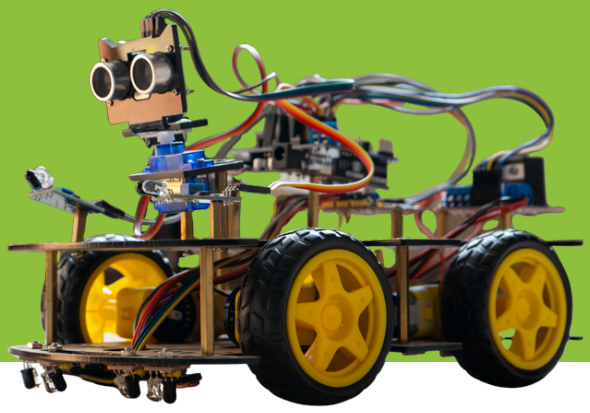

We want to see what VET students can build when technology moves from theory into practice.

WHO CAN PARTICIPATE?

The contest is designed for **VET students and teachers**.

Participants work in teams to develop their project, and collaboration between students, teachers and schools is encouraged.

Teams can also use the contest as an opportunity to exchange ideas and learn from projects being developed in other countries.

Co-funded by the European Union

This project has been funded with support from the European Commission. This communication reflects the views only of the author, and the Commission cannot be held responsible for any use which may be made of the information contained therein.

WHAT ARE WE LOOKING FOR?

We are looking for projects that connect **technology with a real sustainability challenge**.

Your idea does not have to solve every part of a problem. Show us the challenge you identified, the solution you developed and how technology helps make that solution possible.

Projects will go through an evaluation process supported by a scientific and technical evaluation board.

READY TO SUBMIT?

Prepare your project and send your entry through the official submission form.

Before submitting, make sure you check the contest rules for the participation requirements, submission instructions and evaluation process.

LEARN, BUILD AND SHARE

AI-SAVES4ALL is also an opportunity to apply the skills developed through the AI & Sustainability in VET project.

Work with your team. Experiment with technology. Test your idea. And share what you have created with students and teachers across Europe.

Your project could be the next AI-SAVES4ALL showcase.
