AI&SUSTAINABILITY

Presented in TKNIKA's Annual Dissemination Day

Every year, TKNIKA, hosts an annual dissemiantion day for the VET centres of the Baasque Country so we can all share our innovative projects.

This year, once again, 5 members of Politeknika Txorierri assisted to the event, in oirder to present their projects. In this ocassion, Miren Arrien, responsible person for the AI&SUSTAINABILITY project used this opportunity to share not only al the news of the project, but to demonstrate the use of the MOOC in oirder to engage more participants and also commented on the online contest that the project will be doing thourhg the use of using the KIT presented to create a sustainable project with students.

COMPLETE SUCCESS!

The vent resulted in a complete success, as not only many different VET trainers were interested in the project, but also interested in the HUB that is going to be available with a lot of many different project available that can be replicated in class.

This natuire pf replicability is one of the most interesting features for trianers, as they can introduce them in class as a challenge, provided the ETHAZI methodology used in the Basque country.

This could ease the traienrs workload, and provide an opportunity to experience what type of initiatives are being considered in other countries.
